

Koha ILS (Integrated Library System)

Our library uses the Koha open library system for our patron and catalog access. Currently its available only on our local network at the library however, we have plans to eventually allow external access. This will take time and we ask our patrons to be patient as we get things in order. The link on the website will point to this document until then. We will update everyone and make a public announcement once everything is tested and online.
